SUMMARY

A self taught software developer who has a passion for web & mobile development, I am constantly learning new web technologies in order to become a better developer. I have experience working with React, Angular and Ionic.

EDUCATION

Nanodegree, Front-End Web Development   2018-2019
Udacity, USA Online (confirm.udacity.com/R6FMLTUQ)

RELEVANT SKILLS

Languages & Software: JavaScript, HTML/CSS, Photoshop
Frameworks & Libraries: Angular, React, Ionic, Electron, SASS/SCSS
Version control software: Git
Languages: English and Arabic

PROJECTS/ EXPERIENCE

BAC Average Calculator - Free-Time Project
Designed an Android application for calculating the Algerian Baccalaureate grading system
- Built a hybrid android web app based on the Capacitor/Cordova runtimes contacting native Android API's
- Angular and Ionic are used to create a responsive and user friendly UI
- Used: Angular, Ionic, JavaScript (TypeScript), HTML/SCSS

Frogger MK - Udacity Project
Coded a spin-off of the classic arcade game Frogger as part of the Udacity Nanodegree
- Applied an object oriented programming (OOP) approach to build the app
- Used: JavaScript, HTML/CSS

Neighborhood Map - Udacity Project
A single page application (SPA) for searching for places with Google Maps
- Queried Foursquare API to populate Google Maps with markers
- Responsive mobile-first UI design with focus on accessibility
- Used: React, JavaScript, HTML/CSS

MyReads - Udacity Project
A book tracking web SPA allowing users to search for books online
- Developed front-end for existing back-end to search for books using keywords
- Used: React, JavaScript, HTML/CSS
